

Profile Summary

Software Engineering undergraduate at SLIIT with hands-on experience in full-stack development, AI-powered applications, and cloud-native systems. Skilled in Java, Spring Boot, React.js, Node.js, Docker, Kubernetes, REST APIs, and modern software engineering practices through academic and industry projects. Experienced in developing scalable web applications, microservices-based systems, and AI-integrated platforms. Passionate about backend engineering, cloud technologies, and building impactful software solutions in collaborative environments.

Technical Skills

- **Programming Languages** - Java, Python, JavaScript, SQL
- **Frontend Technologies** - React.js, React Native, Tailwind CSS, HTML, CSS
- **Backend Technologies** - Node.js, Express.js, Spring Boot, REST APIs, JWT Authentication
- **Databases** - PostgreSQL, MongoDB, MySQL, SQLite
- **DevOps & Tools** - Docker, Kubernetes (Minikube), Git & GitHub, Maven, Postman, Railway, Vercel
- **Cloud & AI Technologies** - Spring Cloud, Eureka Server, OpenFeign, API Gateway, Gemini AI, Groq API, LLM Integration

Soft Skill

- Problem Solving & Analytical Thinking
- Team Collaboration & Communication
- Adaptability & Continuous Learning
- Attention to Detail & Code Quality
- Time Management & Organization
- Presentation & Documentation Skills

Education

BSc (Hons) in Information Technology Specializing in Software Engineering

SLIIT University (May 2023 – Present)

Current GPA: 3.32

Achievements & Honors - Dean's List (2024)

Relevant Coursework:

- Data Structures and Algorithms
- Database Systems
- Full Stack Web Development
- Mobile Application Development
- UI/UX Design
- Software Engineering

GCE Advanced Level – Physical Science Stream

Taxila Central College, Horana (2016 – 2022)

- GCE A/L: 3S
- GCE O/L: A8, B1

Work Experience

SoftwareEngineer Intern

OREL IT Pvt Ltd (Jul 2025 – Dec 2025)

- Contributed to full-stack software development across the complete Software Development Life Cycle (SDLC), from project planning and requirements analysis to development and delivery.
- Collaborated with development teams to build scalable software solutions and support feature implementation.
- Gained hands-on experience with cloud services, deployment workflows, and modern development practices.
- Participated in debugging, testing, and optimization of applications to improve performance and maintainability.
- Worked in collaborative Agile-based development environments while following version control and code quality practices.

Projects

- 1. Medicare Healthcare Platform – Microservices & Cloud-Native Project** (Associate with SLIIT)
Tech Stack: Java 21, Spring Boot, Spring Cloud (Gateway, Eureka, OpenFeign), Spring Security, JWT, PostgreSQL, React, Docker, Kubernetes (Minikube), Ingress NGINX, Gemini AI, Stripe, Agora Video SDK, Maven
GitHub Repository : github.com/KalharaDMR/HealthCare
 - Built a fully functional healthcare platform using microservices architecture.
 - Implemented patient and doctor registration, appointment booking, telemedicine consultations, and admin management modules.
 - Integrated AI-powered symptom checking using Gemini AI.
 - Added secure online payment functionality using Stripe integration.
 - Containerized services with Docker and deployed the platform using Kubernetes and API Gateway architecture.
 - Implemented secure authentication and authorization using JWT and Spring Security.
- 2. OceanWatch – Illegal Fishing Monitoring & Management System** (Associate with SLIIT)
Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Twilio, SendGrid, Cloudinary, Gemini API
Frontend Repository: github.com/KalharaDMR/illegalFishingFrontend
Backend Repository: github.com/KalharaDMR/illegalFishingBackend
 - Developed a full-stack web platform for monitoring illegal fishing activities and marine protection zones.
 - Built secure REST APIs with JWT authentication and role-based authorization.
 - Integrated Twilio, SendGrid, Cloudinary, and Gemini API for alerts, media management, and AI advisory features.
 - Developed responsive React frontend interfaces including dashboards, protected routes, and approval workflows.
 - Deployed backend services on Railway and frontend applications on Vercel.
- 3. AI-Powered Personal Finance Tracker**
Tech Stack: React Native, Node.js, Express.js, SQLite, REST API, Groq API, Prompt Engineering, LLM Integration
GitHub Repository : github.com/rameshkalhara/personal-finance-tracker
 - Developed an AI-powered mobile finance tracking application with intelligent financial insights.
 - Integrated LLM capabilities using Groq API to provide personalized finance-related recommendations.
 - Designed scalable backend services and REST APIs for secure data handling.
 - Implemented mobile-friendly UI and real-time data management features.
- 4. AI-Powered Recruitment Management System** (Associate with OREL IT)
Tech Stack: React, Node.js, Express.js, PostgreSQL, REST API, Python, Tailwind CSS, Docker
 - Developed an AI-powered recruitment management platform to automate candidate screening and hiring workflows.
 - Implemented full-stack features for applicant management, data processing, and workflow optimization.
 - Utilized AI-driven processing techniques to improve recruitment efficiency and decision-making.
 - Worked with Docker-based environments and RESTful architecture for scalable application deployment.

Certifications

- **AI/ML Engineer–Stage 1 & Stage 2** (SLIIT)
Completed training in Artificial Intelligence and Machine Learning with hands-on exposure to supervised learning algorithms and real-world AI problem-solving.
- **Python Programming – Beginner & Intermediate** (DP Education)
Completed structured Python training covering programming fundamentals, data structures, and intermediate programming concepts
- **Postman API Fundamentals Student Expert Badge** (Postman)
